PROFESSIONAL SUMMARY

Software Engineer | Active DoD Secret Clearance | US Citizen

Software Developer and SDSU Computer Science graduate with comprehensive experience in C++, Python, Java, JavaScript, and machine learning pipeline engineering. Certified in **LangChain (Python)** with hands-on expertise building neural networks, vector similarity search engines (FAISS), and high-throughput microservices. Proven ability to conduct independent technical research, produce comprehensive design artifacts and SOP documentation, and collaborate effectively in high-security team environments. Holds an Active DoD Secret Clearance.

EDUCATION

San Diego State University

Bachelor of Applied Arts and Sciences in Computer Science.

San Diego, CA

GPA 3.61 May 2026

Southwestern Community College

Associate of Science in Computer Science for Transfer.

Chula Vista, CA

GPA 3.62 May 2026

SKILLS

- **Programming Languages:** Python, C++, C, Java, JavaScript, TypeScript, SQL, Bash/Shell, R
- **Machine Learning & Data Mining:** PyTorch, Neural Networks, DINOv2 Embeddings, FAISS Vector Search, YOLO11, OpenCV, Data Preprocessing & Statistics
- **Systems & Infrastructure:** POSIX Sockets, CMake, GoogleTest, Docker, Linux/Unix Command Line, Git/GitHub, RESTful APIs, Nginx, Redis, Docker.
- **Documentation & Methodologies:** Technical Documentation, System Design Artifacts, Requirements Gathering, Agile/Scrum Methodologies

SOFTWARE PROJECTS

Road Trip Planner - Full-Stack Agentic Web System | Python, PyTorch, FAISS, FastAPI, ONNX Runtime, Docker, Vector Search

Engineered an asynchronous multi-agent web platform connecting a responsive frontend to intelligent AI workflows.

- Developed FastAPI backend services and a dynamic React / TypeScript user interface to process concurrent user workflows.
- Implemented strict automated validation rules, payload sanitization, and security constraint checks on incoming API calls.
- Integrated geospatial routing APIs (OSRM/OpenStreetMap) and containerized full environments using Docker Compose.

<https://github.com/IsaacAGz/Roadtrip-Planner>

Magic the Gathering: Card Scanner - AI Asset Discovery & Vector Search Pipeline | Python, FastAPI, OpenAI, Pydantic, LangChain, React

Built a multi-modal computer vision microservice for automated visual discovery, classification, and vector indexing.

- Extracted high-dimensional feature embeddings using **DINOv2** and indexed 20,000+ vector representations in **FAISS** for real-time similarity lookups.
- Deployed optimized model runtimes via **ONNX Runtime** to minimize execution latency in containerized production environments.

WORK EXPERIENCE

Helpdesk Technician

Turning Point Therapeutics

Jan 2022 – Aug 2022

San Diego, CA

- Provided technical troubleshooting and administrative systems support across enterprise operations.
- Built custom internal automation tools using Microsoft Power Apps to streamline hardware asset allocation and tracking processes.

Cyber Network Operator | Data Network Specialist

Marine Corps Air Station Miramar

Jan 2017 – June 2021

San Diego, CA

- Maintained and defended enterprise network infrastructure and virtualized servers (**VMware ESXi**) supporting 300+ users across high-security environments.
- Applied strict Department of Defense cybersecurity standards, access control lists (ACLs), and traffic logging to detect system anomalies.
